Capabilities Statement

Summary:

Double R&C Contracting is a leading provider of reliable water hauling services, specializing in large-scale water delivery operations. With extensive experience in diverse terrains and challenging environments, we are committed to delivering safe, efficient, and timely water solutions for construction projects, emergency response situations, industrial applications, and more.

CORE COMPETENCIES:

Water Tender Leasing

- **Custom-Designed Water Tender:** 4000-gallon water tender equipped with a drafting system, multiple spray bars (front, rear, and side), and pressurized hose systems.
- **Multiple Spray Bar Configurations:** Tender has spray bars on the front, rear, and sides of the truck for versatile water distribution.
- **Pressurized Hose System:** Equipped with a pressurized hose system for effective water application in various construction activities.
- **Flexible Lease Terms:** Provide flexible rental durations (daily, weekly, monthly) that suit the contractor's project timelines, from short-term tasks to long-term needs.
- **Tailored Equipment Solutions:** Can add additional modifications or complementary equipment based on the Prime Contractor's specific needs, such as tanks, hose reels, or custom fittings for specialized tasks.
- **24/7 On-Site Support:** Offer round-the-clock availability of maintenance and emergency support for equipment malfunctions to ensure there are no delays during critical project phases.
- **Skilled Technicians:** Provide access to trained technicians who can quickly service or repair the water tender on-site.
